Reviewed: No

1. zet alle WAN en LAN netwerken in 1 OSPF area (in dit geval area 10)

```
set protocols ospf area 10 network 10.1.0.0/16
```

```
set protocols ospf area 10 network 10.2.0.0/16
```

2. zet optioneel het router-id op de WAN interface

```
set protocols ospf parameters router-id 172.16.1.1
```

3. verifieer de instellingen

```
show ip route
```

```
show ip ospf neighbor
```
