Reviewed: No

1. zet alle WAN en LAN netwerken in 1 OSPF area (in dit geval area 10)

   ```
   set protocols ospf area 10 network 10.1.0.0/16
   set protocols ospf area 10 network 10.2.0.0/16
   ```

2. zet optioneel het router-id op de WAN interface

   ```
   set protocols ospf parameters router-id 172.16.1.1
   ```

3. zeg dat OSPF direct verbonden netwerken moet adverteren

   ```
   set protocols ospf redistribute connected
   ```

4. specificeer de OSPF neighbour

   `` `set protocols OSPF neighbor ``

5. verifieer de instelligen

   ```
   show ip route
   show ip ospf neighbor
   ```
